Captain "Hawk" says **YES** to
the Canopy Rack!!

[Click Here to Read Why](#)

Short Bed Canopy Truck Rack
on Topper

- The Canopy Rack is designed for pickup owners who have toppers on their truck beds and who carry loads up to 250 pounds. It can also be used for vans such as the Ford Transit Connect
- Model 2002-1S will fit canopies with a generally flat roof of any width which measures at least 52 inches long. Model 2002-1L will fit canopies with a generally flat roof of any width which measures at least 74 inches long.
- Side rails prevent loads from sliding off sides and metal loops integrated into the rails make tying cargo down easier.

- Maximum load capacity is limited to strength of topper or a maximum distributed load of up to 250 pounds, whichever is less.

- Some drilling is required to attach the mounting feet, but the main part of the rack may be removed in less than 5 minutes.

- Rubbery gasket pads under mounting feet resist leakage into canopy.

- Product numbers:
2002-1S for short bed trucks.
2002-1L for long bed trucks and vans.

U.S. Rack Product Warranty

U.S. Rack™ products are warranted for a period of one year against all structural defects in materials and workmanship provided that they are assembled, installed, and used in accordance with all manufacturer's specifications and instructions. U.S. Rack cannot warrant the powder-coating on its products. See merchandise [return policy](#).
