Cross-Topper Truck Rack

The Cross-Topper Camper Shell Truck Rack

MADE IN THE USA !

[CrossTopper Rack Instructions](#)

- The Cross-Topper Rack is designed for

**Cross-Topper Rack with
Kayak and Oars**

pickup owners who want to carry loads of up to 250 lbs* on their truck camper shell.

- This rack will fit any size truck topper/ camper shell with a generally flat roof
- The Aluminum Crossbar has the same exterior dimensions as a standard Thule roof top crossbar
- The standard length of the crossbar is about 5- feet; 6-foot crossbars are also available
- Four moveable tie-down loops make securing sports equipment, ladders or other cargo with ratchet straps, bungee cords, or rope a cinch
- Some drilling is required to attach the mounting feet, but the main part of the rack may be removed or re-installed in less than 5 minutes
- Rubbery gasket pads under mounting feet resist leakage into your topper
- Two models are available: Manufactured in black powder-coated steel with aluminum crossbars or in stainless steel with aluminum crossbars
- Specifications: Shipping weight about 20 lbs. Box size is 60" x 5" x 5"

**** 250 Lbs must be distributed across the length of both crossbars***

Installation is Easy!

PLACE THE FOUR FEET
and DRILL...

ADD RUBBER and METAL
WASHERS and THREAD
LOCK NUTS ONTO CARRIAGE
BOLTS INSTALLED
