PRESS RELEASE

FOR IMMEDIATE RELEASE

US RACK™ OFFERS A NO-DRILL HAWAIIAN SAWHORSE RACK™ THAT CARRIES UP TO 300 POUNDS OF CARGO

Madera , CA – U.S. Rack offers the pickup owner a no-drill alternative in truck-bed rack systems. The Hawaiian Sawhorse Rack from U.S. Rack installs in about five minutes, requires no drilling, and can hold up to 300 pounds of cargo – perfect for transporting lumber, ladders, plywood, pipe or other accessories.

Made of black semi-gloss powder-coated steel, the Hawaiian Sawhorse Rack adjusts to fit any pickup and installs or un-installs quickly and easily using a superior clamping system as an alternative to drilling into the truck body. Weighing less than 35 pounds, it can be removed in less than 5 minutes for use as a sawhorse at the job site, or as a multi-purpose stand when back at the garage.

Padded components protect the side rails and truck bed, and the wood of the rack can be painted or stained to custom-match the truck. Eye-bolts are located at each corner of the rack so cargo can be tied down.

“Our Hawaiian Sawhorse Rack offers the best value in a durable, versatile, sawhorse rack for the pickup owner”, said Chris Green, owner of U.S. Rack. “It’s perfect for the pickup owner who needs a great all-purpose, no-drill rack for their truck bed. Our superior clamping system insures that our rack will stay in place and carry a full load, but can be quickly and easily removed for storage or use as a sawhorse.

The Hawaiian Sawhorse Rack is extremely affordable, priced at around \$200, and is warranted for a period of one year against all structural defects in materials and workmanship when

assembled and installed properly. For more info, visit http://www.usrack.com/hawaiian_sawhorse_rack.php.

About US Rack
