## **PRESS RELEASE**

FOR IMMEDIATE RELEASE

### **U.S. RACK™ OFFERS An Extra Sturdy side-mounted ladder rack THAT CARRIES UP TO 250 POUNDS OF CARGO**

**Madera, CA** – The “Strong-Ender” Side-Mounted Ladder Rack from U.S. Rack offers the pickup owner a sturdy alternative in side mounted ladder rack systems. It installs in about five minutes and can hold up to 250 pounds of cargo – perfect for transporting ladders, lumber, pipe, or other long articles.

Made of black semi-gloss powder-coated steel, the Side-Mounted Ladder Rack adjusts to fit any pickup and installs quickly and easily using a superior mounting system. Two heavy-duty adjustable receiver tubes are mounted with bolts to the inside of your truck bed just below the level of the bedrails. Unlike others, this rack features both a fronting plate and a backing plate that sandwich the lip of the truck bedrail between them to resist damage to the sheet metal experienced with other types of side-mount ladder racks.

This versatile ladder rack is expandable from 16" to 30". The front and rear can also be adjusted up or down, and the height of the rack is also adjustable for different model trucks. Adjustable height fits all short and long bed trucks with ordinary bedrails (except the Ford Super crew). Steel loops are provided so that cargo can be easily tied down with straps or ropes or secured with optional chain and lock.

“Our “Strong-Ender” Side-Mounted Ladder Rack offers the best value in a durable, versatile, multi-purpose ladder rack for the pickup owner”, said Chris Green, owner of U.S. Rack. “The

ease of installation, quick removal and sturdy attachment system make this versatile rack one of the best in its class.”

The Side-Mounted Ladder Rack is extremely affordable and is warranted for a period of one year against all structural defects in materials and workmanship when assembled and installed properly.
