

## Features - Super Clamp

model series: 2006-2

**U.S. Rack, Inc., 1-888-877-2257**

The incredible new SUPER CLAMPS securely attach racks to pickup trucks with NO Drilling!

Super Clamps are made of electro-chemically passivated steel that is powder coated. Threaded hardware is stainless steel.

The back of this Dodge Dakota is suspended solely by Super Clamps. This demonstration is done without any other fasteners to show how strong Super Clamps really are.

Super Clamps quickly and securely attach full-size racks to pickups **WITHOUT DRILLING!**

Universal, compact, and sleek...they safely preserve the value of your truck.

Super CLamps come in clam-shell packages; each containing 2 clamps and an allen wrench.

No other tools are needed.
