

HAWAIIAN SAWHORSE RACK SPECIAL FEATURES

We supply all metal parts, hardware, and easy instructions; you supply the crossbars (2 x 4 or 2 x 6 wood beams) for regular trucks or extra-tall trucks such as the Ford Super Duties.

The Sawhorse Rack is a clamp-on truck rack that can also be used as two sawhorses at the work site or as storage stands at home.

Top extensions prevent loads from sliding off the side but are easily removed.

Eye-bolts not only secure clamp to bed but also acts as tie-downs for ropes cords or ratchet straps.

The exterior of all our steel parts is electro-chemically passivated and then powder coated; threaded hardware is stainless steel or zinc plated. Working load is up to 300 lbs.
