

History Snippet of 2nd Generation Toyota Tacoma that will work with our Toyota Tacoma Truck Racks

2nd generation (August 2004-August 2015)

A minor facelift came for 2009, including a slightly revised grille on some models, new LED taillamps, and on the X-Runner, TRD Offroad and TRD Sport models includes smoked headlamp trim. Auxiliary audio input now comes standard. The Access/Double Cab trucks have two new ceiling mounted speakers and available backup monitor. Four new exterior colors are also added to the Tacoma.

After the bankruptcy of GM, GM ended its joint venture with Toyota. Toyota, needing additional production volume at its Texas and Mississippi plants, ended Corolla and Tacoma production at the Fremont plant.^{[[citation needed](#)]} In 2010 all Tacoma production was moved to Toyota's Texas plant in San Antonio. The Tacoma will be built alongside the Tundra. This brought a total of approximately 1,000 new jobs to San Antonio

The 2012 model year refresh featured a restyled front bumper, headlights, grille, hood, new interior and a shark fin antenna for the SiriusXM satellite radio. The 2013 model year comes with touch screen audio system and removes the shark fin antenna and SiriusXM radio capability unless the optional Entune package is installed. 2014 models came with a new SR trim and for 2015 models the regular cab model was discontinued.

In November 2016, Toyota USA settled a class action suit over frame rust, agreeing to inspect and if necessary replace rusted frames on 2005–2010 model year Tacomas, 2007–2008 MY [Tundras](#), and 2005–2008 MY [Sequoias](#) in the US and its territories.^[16]
