

History Snippet of 2nd Generation Toyota Tacoma that inspired us to build the first Integrated clamping system for the Toyota Truck Rack deckrail system.

2nd generation (August 2004-August 2015)

TRD Packages

The Tacoma came in two TRD packages: Sport and Off-Road. The Sport is targeted more towards improved road performance, while the Off-Road is more geared towards the off-road enthusiast. Both are available in 2WD or 4WD, with rear electronic locking differential available in the Off-Road model.

The TRD Sport package comes in two levels. The first level has a color-matched grille, color-matched front/rear bumpers, color-matched door handles, color-matched mirrors, Bilstein shocks/struts, TRD interior, hood with scoop, A/C inverter in the bed, bed rails with cleats, stainless steel exhaust tip and 17" wheels. The second level includes the above and also adds a towing package (oil and transmission coolers), heavy-duty high output alternator, and an aluminum skid plate.^{[[citation needed](#)]} The 2005 to 2008 model years came with a mechanical true limited slip locking differential. The 2009 model year onwards has an open differential with a brake assisted "automatic limited slip" rear differential, similar to a [VSC](#) system.^{[[citation needed](#)]}

The TRD Off-Road package includes a chrome rear bumper, 16" wheels, skid plates, chrome grille, locking rear differential and no hood scoop. Progressive rate springs are included, along with A-TRAC, Hill Descent assist(Automatic only) and Hill Start assist (six speed only). The Off-Road package has a smaller diameter roll bar compared to the Sport package, which gives the Off-Road more wheel articulation and a smoother ride but allows for more body roll. All-Terrain tires and a heavy duty front tow hook complete the package. This package is not available in Double Cab models with long-bed configuration.^{[[citatio](#)]}
