

History Snippet of 2nd Generation Toyota Tundra that will work with our Toyota Truck Racks

Second Generation (2007-Present) continued

- The 2008 model added 13 variations bringing the total to 44 model variants. The 2008 models feature additional standard features at a lower price, also include a new "Tundra Grade" trim which is slotted below the SR5 trim, and geared toward trades people and the price conscious consumer.^[9]
- Toyota made E85 fuel capability standard to 2009 Tundra's equipped with the [5.7-liter](#) V8 in select regions. Toyota also updated the TRD Sport package and added a TRD Rock Warrior package. Prices increased 0.4% over the previous 2008 model year.^[10]

2010 Tundra Double Cab

- The 2010 model year Tundra received visual updates to the grille and tail lamps. A premium Platinum trim level was added. And a new 4.6-liter V8 paired with a 6-speed automatic replaced the previous 4.7-liter [2UZ-FE](#) V8 engine. For added safety, driver and front passenger [knee airbags](#) became standard and NHTSA frontal crash test scores improved to five stars.^[11] The 2010 Tundra began arriving at dealers in late April 2009.
